

## RYCO CLEAN SEAL SYSTEM

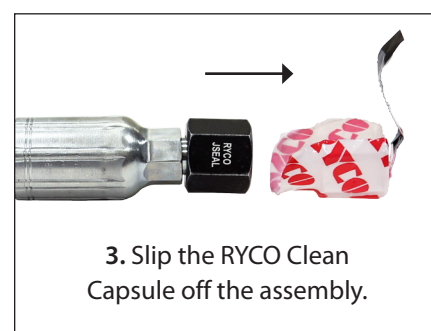

RYCO is proud to implement the new RYCO Clean Seal System on hose assemblies and kits.

The RYCO Clean Seal System utilises a heat shrink technology to encapsulate the end of a hose assembly to allow for durability, security and easy identification.

The in-built pull tab system allows for an easy, clean removal of the RYCO Clean Seal from the hose end.

### Easy Removal:

[Click here](#) to view a video demonstration on how to remove the RYCO Clean Seal System from your hose assembly.

For any additional information please contact RYCO Product Management or your local RYCO representative.
